The background of the slide is a photograph of a person wearing a dark suit, white shirt, and dark tie. The person is shown from the chest up, and their hands are visible at the bottom right, holding a white object. The image is partially obscured by a white text box on the left side.

ISO 50001:2011 – Energy Management System

ISO 50001 is based on the management system model of continual improvement also used for other well-known standards such as ISO 9001 or ISO 14001. This makes it easier for organizations to integrate energy management into their overall efforts to improve quality and environmental management.

ISO 50001:2011 provides a framework of requirements for organizations to:

- ✓ Develop a policy for more efficient use of energy
- ✓ Fix targets and objectives to meet the policy
- ✓ Use data to better understand and make decisions about energy use
- ✓ Measure the results
- ✓ Review how well the policy works, and
- ✓ Continually improve energy management.
